

iPhone

Home - includes curated content, user-generated content, my pond, connections

user generated content may work better for the first page since it can highlight an important feature of the app -- seeing others' opinions on various topics

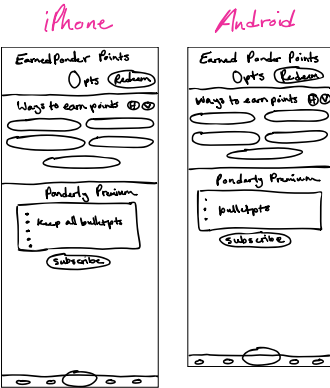

maybe switch places with top ponderers and trending posts?

ponderly says you can earn points by answering daily trivia but the feature isn't on the app. may be best to include it on the first page or so.

I think using kai's idea to combine both my pond and connections would work nicely

the list for the ponder points levels could be condensed since the info is long and repetitive - not sure yet ways to fix it
